The Complete Guide to Absolutely Everything (Abridged): Adventures in Math and Science Oct 21 2022
The complete story of the universe and absolutely everything in it (minus the boring parts). Despite our clever linguistic abilities, humans are spectacularly ill-equipped to comprehend what's happening in the universe. Our senses and intuition routinely mislead us.

The Complete Guide to Absolutely Everything (Abridged) tells the story of how we came to suppress our monkey minds and perceive the true nature of reality. Written with wit and humor, this brief book tells the story of science—tales of fumbles and missteps, errors and egos, hard work, accidents, and some really bad decisions—all of which have created the sum total of human knowledge. Geneticist Adam Rutherford and mathematician Hannah Fry guide readers through time and space, through our bodies and brains, showing how emotions shape our view of reality, how our minds tell us lies, and why a mostly bald and curious ape decided to begin poking at the fabric of the universe. Rutherford and Fry shine as science sleuths, wrestling with some truly head-scratching questions: Where did time come from? Do we have free will? Does my dog love me? Hilarious sidebars present memorable scientific oddities: for example, hypnotized snails, human-sized ants, and the average time it takes most animals to evacuate their bladders. (A surprisingly consistent twenty-one seconds, if you must know.) Both rigorous and playful, *The Complete Guide to Absolutely Everything (Abridged)* is a celebration of the weirdness of the cosmos, the strangeness of humans, and the joys and follies of scientific discovery.

Rutherford and Fry's Complete Guide to Absolutely Everything (Abridged) May 24 2020 In Rutherford and Fry's comprehensive guidebook, they tell the complete story of the universe and absolutely everything in it - skipping over some of the boring parts. This is a celebration of the weirdness of the cosmos, the strangeness of humans and the fact that amid all the

mess, we can somehow make sense of life. Our brains have evolved to tell us all sorts of things that feel intuitively right but just aren't true- the world looks flat, the stars seem fixed in the heavenly firmament, a day is 24 hours. This book is crammed full of tales of how stuff really works. With the power of science, Rutherford and Fry show us how to bypass our monkey-brains, taking us on a journey from the origin of time and space, via planets, galaxies, evolution, the dinosaurs, all the way into our minds, and wrestling with some truly head-scratching questions that only science can answer- What is time, and where does it come from? Why are animals the size and shape they are? What is a thought? How horoscopes work (Spoiler- they don't, but you think they do) Does my dog love me? Why nothing is truly round Do you need your eyes to see?
