[The Volkswagen Beetle](#) Dec 20 2019 The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T Ford and designed by Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and, incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed history of the Volkswagen Beetle. Other titles for Shire by this author are: The Bean Austin Seven The Citroen The Bullnose Morris Classic Cars The Model T Ford The Rolls-Royce

Patina Volkswagens Apr 16 2022 Since the early 2000s, the apparent explosion of interest in Volkswagens with original paint, rust and patina has inspired a generation of car fanatics, who might not be able to afford to restore a car to show condition, but still want a good looking, cool car that will stand out from the crowd. Once looked upon as being in need of restoration, cars with original paint, rust and patina, especially within the global Volkswagen community, have gradually become far more popular than restored cars. When walking down a line of cars at a car show, it's easy to see why;

these cars are rare, unspoiled survivors – cars that tell a story of an interesting and varied past. The look of the Volkswagens being built in this style is so honest, unspoiled and characterful, that it has begun to inspire the media; even Hollywood movie stars and celebrities. Whilst this has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into something cool with a high price tag, the generation it initially inspired has grown with the hobby, and produced a micro-industry that still manages to embrace the 'Built not bought' ethos. This book, superbly illustrated with stunning colour photographs, takes an inside look at some of the key car builders, dealers, celebrities and hobbyists, as well as the different styles of build, meaning every single car has a style all its own. Foreword by Drew Pritchard of TV's 'Salvage Hunters' fame.

Thinking Small Mar 03 2021 Sometimes achieving big things requires the ability to think small. This simple concept was the driving force that propelled the Volkswagen Beetle to become an avatar of American-style freedom, a household brand, and a global icon. The VW Bug inspired the ad men of Madison Avenue, beguiled Woodstock Nation, and has recently been re-imagined for the hipster generation. And while today it is surely one of the most recognizable cars in the world, few of us know the compelling details of this car's story. In *Thinking Small*, journalist and cultural historian Andrea Hiott retraces the improbable journey of this little car that changed the world. Andrea Hiott's wide-ranging narrative stretches from the factory floors of Weimar Germany to the executive suites of today's automotive innovators, showing how a succession of artists and engineers shepherded the Beetle to market through periods of privation and war, reconstruction and recovery. Henry Ford's Model T may have revolutionized the American auto industry, but for years Europe remained a place where only the elite drove cars. That all changed with the advent of the Volkswagen, the product of a Nazi initiative to bring driving to the masses. But Hitler's concept of "the people's car" would soon take on new meaning. As Germany rebuilt from the rubble of World War II, a whole generation succumbed to the charms of the world's most huggable automobile. Indeed, the story of the Volkswagen is a story about people, and Hiott introduces us to the men who believed in it, built it, and sold it: Ferdinand Porsche, the visionary Austrian automobile designer whose futuristic dream of an affordable family vehicle was fatally compromised by his patron Adolf Hitler's monomaniacal drive toward war; Heinrich Nordhoff, the forward-thinking German industrialist whose management innovations made mass production of the Beetle a reality; and Bill Bernbach, the Jewish American advertising executive whose team of Madison Avenue mavericks dreamed up the legendary ad campaign that transformed the quintessential German compact into an outsize worldwide phenomenon. *Thinking Small* is the remarkable story of an automobile and an idea. Hatched in an age of darkness, the Beetle emerged into the light of a new era as a symbol of individuality and personal mobility—a triumph not of the will but of the imagination.

The First Beetle Aug 08 2021 This is the story of a little miracle on four wheels, discovered in a field in Eastern Europe by two of the most competent collectors of air-cooled Volkswagens: The 38 split window Beetle. The vehicle with the chassis number 3806 is as black and shiny as it was more than 70 years ago. It is the pride and joy of the Grundmann collection! When the discovery of this prototype of the VW 38 was posted on an internet forum, the international Beetle scene went wild. For the experienced VW restorers Traugott and Christian Grundmann there was no question: the first "Splitty" would become the centrepiece of their exquisite old-timer collection. The VW 38's condition may have been shocking, but it was not beyond hope. Supported by a brilliant team of welders, upholsterers, painters, mechanics and VW enthusiasts from around the world, they managed to give the dear little Beetle a complete makeover. Traugott Grundmann and his son Christian have a little piece of paradise in the Weser Hills: they have created their very own automobile museum for one of the most exclusive Volkswagen collections in the world. More than 50 old-timers, including many one-offs and special models, are displayed in all their splendor in Hessisch Oldendorf - most of them were restored to their former glory in the Grundmann's workshop. The VW 38 is the exhibition's new shining star. Axel Struwe leads two lives: one as a food photographer and qualified photo designer, the other as a passionate collector and restorer of VW old-timers. When the German first heard that his friend Christian Grundmann had discovered a VW 38, it became obvious that he would not only support the project with his practical experience, but also document the journey with his camera. Clauspeter Becker was three years old when the first split window Beetle appeared. He can vividly remember sitting in a VW 38 as a young lad in Berlin - but in the back seat. As part of his research for this book, the renowned specialist journalist and book writer from Neuhausen near Stuttgart, who received the Johnny-Rozendaal-Uhr award in 2010 for his entire oeuvre, finally got to take the steering wheel himself. 83 colour, 16 b/w

Volkswagen Beetles and Buses Jun 25 2020 This illustrated history celebrates the 75th and 70th anniversaries of Volkswagen's two most iconic vehicles, from the first Beetles spearheaded by Ferdinand Porsche in the 1940s to the buses that became synonymous with a generation. Volkswagen is one of the most beloved brands in motoring history, thanks largely to two instantly recognizable vehicles: the Beetle (a.k.a. Bug) and the Bus. More than 23 million VW Beetles have buzzed into the world since 1945, while the VW Bus presaged the minivan by thirty-plus years. Volkswagen: Beetles and Buses examines and celebrates all aspects of the vehicles and the many cultural associations that have swirled around them for more than seven decades. The diminutive rear-engined and easily mass-produced Beetle became the most popular imported car in America during the 1960s. Its success was due to its familiar face, its wildly clever ad campaigns, and the sheer numbers produced. The equally compact yet spacious Bus (a.k.a. Kombi, Microbus, Type 2, Transporter, and simply "van") has won millions of fans around the world with its practicality, simplicity, and design. In this beautifully illustrated and authoritatively written celebration, author Russell Hayes looks back at the vehicles while focusing on the classic air-cooled VWs that ran into the late 1970s. Along the way, readers witness the Beetle and Bus at work and at play and learn about vehicle development and growing roles in popular culture, including star appearances in films like *The Love Bug*, *Little Miss Sunshine*, *Footloose*, *Fight Club*, *The Big Lebowski*, and *Fast Times at Ridgemont High*, as well as television shows like *Lost* and *Once Upon a Time* and on the covers of the Beatles' *Abbey Road* and Bob Dylan's *Freewheelin'* album. The story is brought up to date with coverage of the New Beetle and plans for the VW Buzz, a modern electric version of the iconic Microbus due in 2022. Volkswagen: Beetles and Buses deserves a place in the motoring libraries of VW owners, automotive enthusiasts, and those simply interested in pop culture. It's the ultimate illustrated history of these beloved vehicles.

More than forty brand-new stories, poems, anecdotes, and general love letters plus 100 treasured photographs, illustrations, and cartoons from smitten owners recall the highs and lows of the golden days of Beetlemania: water splashing through holes in the rusted floor; trying to make out in the backseat (indeed, trying to make it out of the backseat; the mystery test button on the dash, the secret panel behind the footrest, the battery so conveniently(!) located under the backseat), the scalding blast of sudden heat as the car chugged up an incline. No self-respecting Boomer can forget the Beetle, even if he or she is driving a Beemer today. Now is the time to get out the bellbottoms and put those memory cells in gear. The Bug is back.
