Tells the story of the people who settled and built the Golden State and includes a timeline of significant events, a list of historic sites to visit, and Web resources. Good friends come in all shapes and sizes! Unlikely Friendships, the runaway New York Times bestseller with a compelling message of hope and friendship and differences overcome, is rewritten just for younger readers. This hardcover chapter book for children ages seven and up collects five heartwarming true stories of animal friendship: a hippo and the goat who is his best friend, an iguana that snuggles with a cat, a dog that takes care of a blind deer, a cat and orangutan who become friends, and a mother dog who cares for a tiny piglet. Chapter books give young readers a strong sense of accomplishment, and these heartwarming animal stories, with their incredible photographs and inexplicable mysteries of attraction, their focus on friendship, love, and the ways that creatures of all different species can find common bonds of affection, will keep kids turning the pages to find out about the unusual ways animals help each other and discover the love of new friends. Each is a perfect gift for young animal lovers, and a lovely subject to help kids get reading. 'As sunset came on, Shara asked Drew to set the table and went in to check on Mum. She opened the teapot and saw that Mum had drunk all the mint tea, but she was sound asleep. Shara was worried. Her mother didn't look right. In fact, she looked terribly pale. For a moment, Shara wasn't even sure she was breathing. There was a stillness to her mother's face and limbs that Shara had never seen before.' When Shara and Drew's mother falls unconscious after drinking a cup of mint tea, the children call for an ambulance and she is admitted into hospital, where she remains in a coma for a long time. The children move in with their grandmother, but the kids think their mum is dead and the police want them for her murder... The thought of going to jail scares Drew, who is 10 years old and Shara, who is 12. They also believe they are being a pain to their 80-year-old grandmother, so they run away and return to their house, using their secret entrance as the door is locked. Meanwhile, the police are looking everywhere for the missing kids, but they are nowhere to be found. A few days later, a homeless man called Linkin enters the children's family home through the loose basement window. However, as Linkin settles in, things start to go wrong - after he brings in his fugitive friend Jake. Life is now living hell for the kids. They decide to escape, but Drew is too scared to try, so Shara decides to try it alone... Double S Kids is a young adult novel suitable for 9-17 year olds, written by an 11-year-old for those like herself. Contains the latest data, maps of the world, and graphs as well as lively essays about the world, geography-themed games, crosswords, and picture puzzles. An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students. Follow one day in the real lives of seven kids from around the world—Italy, Japan, Iran, India, Peru, Uganda, and Russia! In Japan, Kei plays Freeze Tag, while in Uganda, Daphine likes to jump rope. While the way they play may differ, the shared rhythm of their days—and this one world we all share—unites them. This genuine exchange provides a window into traditions that may be different from our own as well as mirrors reflecting our common experiences. Inspired by his own travels, Matt Lamonth transports readers across the globe and back with this luminous and thoughtful picture book. Perfect for kids learning about new cultures and customs Educates children on the importance of similarities and differences Gives kids a unique look into the lives of others across the globe If you enjoyed Carson Ellis' Home, you're sure to enjoy the window into the world provided by This is How We Do It. This children's picture book is ideal for parents or teachers looking for the following: World Book for Kids Travel Book for Kids Beginning Reading Books Cultures for Kids Books Families Around the World Books Most marshmallows are born into marshmallow families, play with marshmallow friends, and go to marshmallow school where they learn to be squishy. Most marshmallows read a book before bed and then fall asleep to dream ordinary marshmallow dreams. But, this book isn't about most marshmallows, is it? No. That's because author Rowboat Watkins knows that, just like you, some marshmallows have big dreams, and just like you, these marshmallows can do anything they set their minds to. This sweet and silly book is an inspiring reminder to everyone that by being true to ourselves, each of us has the power to be extraordinary. Whether for a new parent or a recent graduate, the message here will fit the bill. Another slightly off kilter book from rising picture book-maker Rowboat Watkins. The art (and subversive humor) has nods to Maurice Sendak (with whom Watkins studied), but is unlike anything else out there. If you and your child are a fan of Rude Cakes, Pete With No Pants, and The Legend of Rock Paper Scissors, you will love this book. This book is ideal for: • Read Aloud Book for preschoolers • Early Reading book for toddlers • Parents & Grandparents • Recent high school and college graduate gifts • Anyone looking for an empowering story WHAT IS JUNKET? Junket is a delicious custard and a lovely dessert. But why is the old man with a red beard and red slippers eating such an enormous bowl of junket, and what could he possibly be thinking about while he feasts? That's a good question! And one that the old man poses to the crowds and crowds of people that gather to watch him. In fact, almost everyone in the whole world wants to know the answer to this riddle. And only one little boy has the answer. This ingenious book of inspired nonsense was the very first from Dorothy Kunhardt, whose Pat the Bunny has delighted generations of young children. Answers many questions kids have about money including its history, how to spend and save it, common terms, and what credit is. "Instead of trusting kids with choices . . . many parents insist on micromanaging everything from homework to friendships. For these parents, Stixrud and Johnson have a simple message: Stop." —NPR "This humane, thoughtful book turns the latest brain science into valuable practical advice for parents." —Paul Tough, New York Times bestselling author of How Children Succeed A few years ago, Bill Stixrud and Ned Johnson started noticing the same problem from different angles: Even high-performing kids were coming to them acutely stressed and lacking motivation. Many complained they had no control over their lives. Some stumbled in high school or hit college and unraveled. Bill is a clinical neuropsychologist who helps kids gripped by anxiety or struggling to learn. Ned is a motivational coach who runs an elite tutoring service. Together they discovered that the best antidote to stress is to give kids more of a sense of control over their lives. But this doesn't mean giving up your authority as a parent. In this groundbreaking book they reveal how you can actively help your child to sculpt a brain that is resilient, and ready to take on new challenges. The Self-Driven Child offers a combination of cutting-edge brain science, the latest discoveries in behavioral therapy, and case studies drawn from the thousands of kids and teens Bill and Ned have helped over the years to teach you how to set your child on the real road to success. As parents, we can only drive our kids so far. At some point, they will have to take the wheel and map out their own path. But there is a lot you can do before then to help them tackle the road ahead with resilience and imagination. Award-winning artist Sylvia Long has teamed with up-and-coming author Dianna Aston to create this gorgeous and informative introduction to eggs. From tiny hummingbird eggs to giant ostrich eggs, oval ladybug eggs to tubular dogfish eggs, gooey frog eggs to fossilized dinosaur eggs, it magnificently captures the incredible variety of eggs and celebrates their beauty and wonder. The evocative text is sure to inspire lively questions and observations. Yet while poetic in voice and elegant in design, the book introduces children to more than 60 types of eggs and an interesting array of egg facts. Even the endpapers brim with information. A tender and fascinating guide that is equally at home being read to a child on a parent's lap as in a classroom reading circle. Plus, this is the fixed format version, which looks almost identical to the print edition. A Reading Rainbow book for your child Recommend by experts for children who are reading independently and transitioning to longer books. They often send her odd gifts and notes about how important it is to follow her heart and to protect the plants and animals around her. Cassie explores the meadow. She makes friends with the animals and learns the names of the plants. She is haunted by a face she finds, looking up at her from the pond. Although it looks just like her, it is not her reflection! The girl under the surface of the water eventually leads her to a beautiful metal gate hidden under the waterfall that cascades into the pond. The gate is locked with a padlock in the shape of a flower. A tragic portrait of adolescents who kill their parents is revealed in this volume: these young people almost always kill out of desperation as they are almost always victims of severe child abuse, neglect and dysfunctional parenting. Drawing upon her experience as a clinician, expert witness and scholar, the author asserts that a combination of interconnected problems creates the conditions for parricide, including: severe sexual, physical and/or verbal abuse of the child; escalating violence in the family; and increasing vulnerability of the child to stressors in the home. This sensitive volume includes an examination of interventions that are effective in treating such children. Heide concludes that ad From two of the world's top scientists and one of the world's top science writers (all parents), Dirt Is Good is a q&a-based guide to everything you need to know about kids & germs. "Is it OK for my child to eat dirt?" That's just one of the many questions authors Jack Gilbert and Rob Knight are bombarded with every week from parents all over the world. They've heard everything from "My two-year-old gets constant ear infections. Should I give her antibiotics? Or probiotics?" to "I heard that my son's asthma was caused by a lack of microbial exposure. Is this true, and if so what can I do about it now?" Google these questions, and you'll be overwhelmed with answers. The internet is rife with speculation and misinformation about the risks and benefits of what most parents think of as simply germs, but which scientists now call the microbiome: the combined activity of all the tiny organisms inside our bodies and the surrounding environment that have an enormous impact on our health and well-being. Who better to turn to for answers than Drs. Gilbert and Knight, two of the top scientists leading the investigation into the microbiome—an investigation that is producing fascinating discoveries and bringing answers to parents who want to do the best for their young children. Dirt Is Good is a comprehensive, authoritative, accessible guide you've been searching for. In 2020, a dangerous new virus spread all over the world, and it can only be combatted through joint societal actions that make great demands on all of us. But what do the terms "virus" and "pandemic" even mean? Through her colourful pictures and short informative texts, Ziska Riemann explains to her preschool and primary school-aged audience why it is that during a pandem-ic we need to adjust our everyday lives to confront the new challenges, and how, despite the many restrictions, children and their families in fact have an opportunity to discover their surroundings afresh. The aim of course is that we all remain healthy, or recover successfully, so that soon we will be able to play together, learn, work and travel freely once again. A challenge to the cultural tradition of corporal punishment in Black homes and its connections to racial violence in America Why do so many African Americans have such a special attachment to whupping children? Studies show that nearly 80 percent of black parents see spanking, popping, pinching, and beating as reasonable, effective ways to teach respect and to protect black children from the streets, incarceration, encounters with racism, or worse. However, the consequences of this widely accepted approach to child-rearing are far-reaching and seldom discussed. Dr. Stacey Patton's extensive research suggests that corporal punishment is a crucial factor in explaining why black folks are subject to disproportionately higher rates of school suspensions and expulsions, criminal prosecutions, improper mental health diagnoses, child abuse cases, and foster care placements, which too often funnel abused and traumatized children into the prison system. Weaving together race, religion, history, popular culture, science, policing, psychology, and personal testimonies, Dr. Patton connects what happens at home to what happens in the streets in a way that is thought-provoking, unforgettable, and deeply sobering. Spare the Kids is not just a book. It is part of a growing national movement to provide positive, nonviolent discipline practices to those rearing, teaching, and caring for children of color. How do you manage a child who gets stomachaches every school

morning, who refuses after-school activities, or who is trapped in the bathroom with compulsive washing? Children like these put a palpable strain on frustrated, helpless parents and teachers. And there is no escaping the problem: One in every five kids suffers from a diagnosable anxiety disorder. Unfortunately, when parents or professionals offer help in traditional ways, they unknowingly reinforce a child's worry and avoidance. From their success with hundreds of organizations, schools, and families, Reid Wilson, PhD, and Lynn Lyons, LICSW, share their unconventional approach of stepping into uncertainty in a way that is currently unfamiliar but infinitely successful. Using current research and contemporary examples, the book exposes the most common anxiety-enhancing patterns—including reassurance, accommodation, avoidance, and poor problem solving—and offers a concrete plan with 7 key principles that foster change. And, since new research reveals how anxious parents typically make for anxious children, the book offers exercises and techniques to change both the children's and the parental patterns of thinking and behaving. This book challenges our basic instincts about how to help fearful kids and will serve as the antidote for an anxious nation of kids and their parents.
