Inspiring Innovations in Language Teaching Jul 26 2020
The author, an educator and administrator with international experience, considers four examples of innovation in foreign language teaching in Scotland: languages in the primary school, a curriculum renewal project, perspectives of an innovative school department, and a training institution's partnership approach to initial teaching training. Placed beside each Scottish example are complementary pieces involving developments in other parts of the world: Australia's National Language Policy, the Bangalore project from India, New Zealand's public service reforms, and an American institutional approach to innovation. Further Language Learning in Linguistic and Cultural

Diverse Contexts Nov 17 2019
Further Language Learning in Linguistic and Cultural Diverse Contexts deals with the interdisciplinary area of multilingual and intercultural education and the increasing interest in sociolinguistic and sociocultural aspects of further language learning. It presents the individual, family, scholastic, and extra-scholastic circumstances that promote or limit language learning and its outcomes among young learners of a further language. The intertwined, dynamic interrelationship between intercultural and language learning at

primary school is shown by means of the European border region South Tyrol that is characteristic for its linguistic and cultural diversity and serves to demonstrate authentic benefits, challenges, and difficulties in hyper complex and super-diverse contexts. The book analyzes experiences and perceptions as reported by primary school teachers, children, and parents, considering the impact of many factors on further language learning, including school organization, extra curricular activities, and self-initiated encounter pedagogy. Further Language Learning in Linguistic and Cultural Diverse Contexts will be vital reading for academics, researchers, and post-graduate students in the fields of education, language learning, sociolinguistics, interculturalism, and super-diversity.

The Bantu Languages Jun 05 2021 Gerard Philippson is Professor of Bantu Languages at the Institut National des Langues et Civilisations Orientales and is a member of the Dynamique de Langage research team of the Centre National de la Recherche Scientifique, Lyon II University. He has mainly worked on comparative Bantu tonology. Other areas of interest include Afro-Asiatic, general phonology, linguistic classification and its correlation with population genetics.

Language Policy in the People's Republic of China Mar 22 2020 Language matters in China. It is about power, identity, opportunities, and, above all, passion and nationalism. During the past five decades China's language engineering projects transformed its linguistic landscape, affecting over one billion people's lives, including both the majority and minority populations. The Han majority have been juggling between their home vernaculars and the official speech, Putonghua - a speech of no native speakers - and reading their way through a labyrinth of the traditional, simplified, and Pinyin (Roman) scripts. Moreover, the various minority groups have been struggling

between their native languages and Chinese, maintaining the former for their heritages and identities and learning the latter for quality education and socioeconomic advancement. The contributors of this volume provide the first comprehensive scrutiny of this sweeping linguistic revolution from three unique perspectives. First, outside scholars critically question the parities between constitutional rights and actual practices and between policies and outcomes. Second, inside policy practitioners review their own project involvements and inside politics, pondering over missteps, undergoing soul-searching, and theorizing their personal experiences. Third, scholars of minority origin give inside views of policy implementations and challenges in their home communities. The volume sheds light on the complexity of language policy making and implementing as well as on the politics and ideology of language in contemporary China.

English as an International Language in Asia: Implications for Language Education Dec 31 2020 Even as Anglophone power wanes in Asia, and China and India rise, the role of the English language in the region continues to develop. How are students in Asian nations such as Vietnam, Malaysia and China itself being taught English? This much-needed overview analyzes the differing language education policies of selected countries that also include Indonesia, Japan and Sri Lanka. Noting ASEAN's adoption of English as its sole working language, it traces the influence of globalization on English language education in Asia: in many systems, it pushes local languages off the curriculum and is taught as a second language after the national one. Informed by a comprehensive review of current research and practice in English teaching in Asia, this volume considers the many different roles English is playing across the region, as well as offering an informed assessment of the prospects of

English—and Chinese—being a universal language of communication.

The Languages and Linguistics of the New Guinea Area Feb 13 2022 *The Languages and Linguistics of the New Guinea Area: A Comprehensive Guide* is part of the multi-volume reference work on the languages and linguistics of all major regions of the world. The island of New Guinea and its offshore islands is arguably the most diverse and least documented linguistic hotspot in the world - home to over 1300 languages, almost one fifth of all living languages, in more than 40 separate families, along with numerous isolates. Traditionally one of the least understood linguistic regions, ongoing research allows for the first time a comprehensive guide. Given the vastness of the region and limited previous overviews, this volume focuses on an account of the families and major languages of each area within the region, including brief grammatical descriptions of many of the languages. The volume also includes a typological overview of Papuan languages, and a chapter on Austronesian-Papuan contact. It will make accessible current knowledge on this complex region, and will be the standard reference on the region. It is aimed at typologists, endangered language specialists, graduate and advanced undergraduate students, and all those interested in linguistic diversity and understanding this least known linguistic region.

Challenges for Language Education and Policy

Nov 29 2020 Addressing a wide range of issues in applied linguistics, sociolinguistics, and multilingualism, this volume focuses on

language users, the ‘people.’ Making creative connections between existing scholarship in language policy and contemporary theory and research in other social sciences, authors from around the world offer new critical perspectives for analyzing language phenomena and language theories, suggesting new meeting points among language users and language policy makers, norms, and traditions in diverse cultural, geographical, and historical contexts. Identifying and expanding on previously neglected aspects of language studies, the book is inspired by the work of Elana Shohamy, whose critical view and innovative work on a broad spectrum of key topics in applied linguistics has influenced many scholars in the field to think “out of the box” and to reconsider some basic commonly held understandings, specifically with regard to the impact of language and languaging on individual language users rather than on the masses.

Multilingual La La Land Nov 10 2021 Home to immigrants from more than 140 countries speaking over 180 languages, Los Angeles is a microcosm of the world. While Los Angeles' ethnic enclaves have been the subject of study by researchers from a wide range of fields, these enclaves remain under-researched from a linguistic standpoint. *Multilingual La La Land* addresses the sociolinguistic landscape of the Greater Los Angeles (GLA) area, providing in-depth accounts of the sixteen most spoken languages other than English in the region. Each chapter introduces the history of the language in the L.A. region, uses census figures and residential densities to examine location-based and network-based speech communities, and discusses the patterns of usage that characterize the language, including motivations to maintain the language. How these patterns and

trends bear on the vitality of each language is a central consideration of this book.

Language and a Sense of Place Dec 23 2022 Place has always been central to studies of language, variation and change. Since the eighteenth century, dialectologists have been mapping language features according to boundaries - both physical and institutional. In the twentieth century, variationist sociolinguists developed techniques to correlate language use with speakers' orientations to place. More recently, perceptual dialectologists are examining the cognitive and ideological processes involved in language-place correlations and working on ways to understand how speakers mentally process space. Bringing together research from across the field of language variation, this volume explores the extent of twenty-first century approaches to place. It features work from both established and influential scholars, and up and coming researchers, and brings language variation research up to date. The volume focuses on four key areas of research: processes of language variation and change across time and space; methods and datasets for regional analysis; perceptions of the local in language research; and ideological representations of place.

Processability and Language Acquisition in the Asia-Pacific Region Aug 19 2022 This PALART volume makes an original addition to the Series as it opens a stimulating window on the

Asia-Pacific region of the world by bringing together a great deal of empirical and theoretical new work in Second Language Acquisition within the Processability Theory (PT) framework. Readers will be pleasantly surprised to be able to access, within one publication, so much novel and overview information on SLA while maintaining its focus on PT, its theoretical developments including its 2005 (Pienemann et al.) and 2015 (Bettoni & Di Biase) extensions and how they relate to PT's foundation work (Pienemann 1998), as well as its applications to language learning and teaching in Japanese, Chinese, Hindi, Malay and English in countries of the Asia-Pacific region including Australia. This volume demonstrates the vitality and the dynamic nature of PT and its potential as a tool for understanding SLA both theory and practice.

Clues to Lower Mississippi Valley Histories Mar 02 2021 2019
Choice Outstanding Academic Title In Clues to Lower Mississippi Valley Histories David V. Kaufman offers a stunning relational analysis of social, cultural, and linguistic change in the Lower Mississippi Valley from 500 to 1700. He charts how linguistic evidence aids the understanding of earlier cultural and social patterns, traces the diaspora of indigenous peoples, and uncovers instances of human migration. Historical linguistics establishes evidence of contact between indigenous peoples in the linguistic record where other disciplinary approaches have obscured these connections. The Mississippi Valley is the heartland of early North American civilizations. The region is a rich and diversified center of transportation for every part of eastern North America and to Mesoamerica. The Lower Mississippi Valley region emerged as the home of the earliest mound-building societies in the Americas and was home to some of the most impressive kingdoms encountered by Spanish and French explorers. The languages of the region

provide the key to the realities experienced by these indigenous peoples, their histories, and their relationships. Clues to Lower Mississippi Valley Histories focuses on relationships that constitute what linguists call a sprachbund (language union), or language area. Kaufman illuminates and articulates these linguistic relationships through a skillful examination of archaeological and ethnohistorical data. Clues to Lower Mississippi Valley Histories examines the relationship between linguistics and archaeology to elucidate the early history of the Lower Mississippi Valley.

Language Attitudes and Minority Rights Jul 06 2021 This book presents a detailed sociolinguistic study of the traditionally Catalan-speaking areas of Southern France, and sheds new light on language attitudes, phonetic variation, language ideologies and minority language rights. The region's complex dual identity, both Catalan and French, both peripheral and strategic, is shown to be reflected in the book's attitudinal findings which in turn act as reliable predictors of phonetic variation. The author's careful discursive analysis paints a clear picture of the linguistic ideological landscape: in which French dominates as the language of status and prestige. This innovative work, employing cutting-edge mixed methods, provides an in-depth account of an under-examined language situation, and draws on this research to propose a number of policy recommendations to protect minority rights for speakers of Catalan in the region. Combining language attitudes, sociophonetics, discourse studies, and language policy, this will provide an invaluable reference

for scholars of French and Catalan studies and minority languages around the world.

Linguistic Policies and the Survival of Regional Languages

in France and Britain Mar 14 2022 It was traditionally assumed that a single official language was necessary for the wellbeing of the state, particularly in France and Britain. This assumption is now questioned, and regional languages are making, in some cases, an impressive comeback. This book analyses a range of languages' development, decline and efforts at regeneration.

What Is Sociolinguistics? Feb 01 2021 How is our language affected by our ethnicity, gender, and region? How are our conversations and other interactions structured? How does society view and regulate language? How do we use language to

present ourselves to others? In this revised and updated second edition of the popular *What Is Sociolinguistics?* Gerard Van Herk explores these and other intriguing questions about language, how we use it, and its relationships to society. Van Herk guides the reader on a tour through the major issues that define the field, including region, status, gender, time, language attitudes, interaction, and style, at the same time exploring the sociolinguistics of multilingualism, culture and ethnicity, language contact, and education. This second edition has been revised and updated to include new and more exercises, discussion questions, and suggested readings, as well as expanded chapters exploring gender duality and Latino English. Key readings are introduced in Van Herk's clear and engaging voice, which accompanies the text throughout, providing an accessible point of entry for those new to, or less familiar with, sociolinguistics. Chapter summaries and textboxes are similarly employed to signpost and illuminate learning. A companion website features PowerPoint slides for each chapter with suggestions for framing class discussions and exercises, further examples of concepts discussed, additional reading suggestions, and ready-to-go slides for class presentation. Language Politics of Regional Integration Jan 12 2022

Language policies impact language choice, language prestige, and language spread. Rising regional integration, both formal and informal, adds to the sensitivity and complexity of language politics, whether in North America, South America or Europe. This book shows how language politics vary across the Americas and contrast with Europe.

Dynamic Ecologies Oct 29 2020 This volume provides a fascinating glimpse into the complex language ecologies of Southeast Asia. Adopting a relational perspective, it considers their significance for the region, its peoples, the policy and practice of language teaching, learning and assessment and the fate of local languages. It gives particular prominence to the relationship between English and Chinese, it's likely transformation at a time of significant global change and the impact that these two languages and their synergy will have on the place of other languages and dialects. *Dynamic Ecologies: A Relational Perspective on Languages Education in the Asia-Pacific Region* draws on the research and insights of key scholars in the field and provides case studies that illustrate the impact of relevant language policy in countries including Singapore, Malaysia, Hong Kong, South Korea and Australia.

Languages and Genes in Northwestern China and Adjacent Regions Oct 17 2019 This book presents an investigation of language contact, focusing on Northwestern China. It breaks down the barrier between human sciences and natural sciences in order to reconsider the diversity of languages on the basis of the latest research findings from genetics, linguistics, and other domains, offering valuable insights into when and how the divergence of languages and genes began and language and gene admixture and replacement occurred. The book focuses on language evolution between the border of Gansu and Qinghai Province in China, but the research doesn't neglect the area beyond China's northern borders. Manchu, a dying language belonging to the Tungusic group, is also studied to enhance our understanding of language replacement. This work is the result of a four-year collaboration between teams of geneticists and linguists in France and China.

The Bunganditj (Buwandik) Language of the Mount Gambier

Region Aug 07 2021 A single language appears to have been spoken in a triangle that stretched from somewhere north of Lacepede Bay on the coast of South Australia across to Bordertown on the Victorian border and south to the coast where the mouth of the Glenelg in far western Victoria formed the south-eastern corner. A consideration of various references indicates clearly that the territory of the Buwandik, alternatively Bunganditj, extended to the mouth of the Glenelg and further north it extended to Coleraine and perhaps Balmoral. Practically all our data comes from old sources. There are twelve sources of vocabulary for the language and two direct sources of grammatical information on the dialect spoken by the Booandik or Bunganditj. One source for the grammar is a sketch of three pages by D.S. Stewart; the other is a slightly longer sketch by R.H. Mathews, which exists in two forms, manuscript and published. Some further grammatical information can be obtained from the 'Mount Gambier' sentences in William Thomas' Dialogues in six dialects (details below), and a few further scraps can be gleaned from the word lists, specially from the one by Stewart which accompanies his grammatical sketch.

Constitutional Law in Belgium May 04 2021 Derived from the renowned multi-volume International Encyclopaedia of Laws, this very useful analysis of constitutional law in Belgium provides essential information on the country's sources of constitutional law, its form of government, and its administrative structure. Lawyers who handle transnational matters will appreciate the clarifications of particular terminology and its application. Throughout the book, the treatment emphasizes the specific points at which constitutional law affects the interpretation of legal rules and procedure. Thorough coverage by a local expert fully describes the political system, the historical background, the role of treaties, legislation,

jurisprudence, and administrative regulations. The discussion of the form and structure of government outlines its legal status, the jurisdiction and workings of the central state organs, the subdivisions of the state, its decentralized authorities, and concepts of citizenship. Special issues include the legal position of aliens, foreign relations, taxing and spending powers, emergency laws, the power of the military, and the constitutional relationship between church and state. Details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for both practising and academic jurists. Lawyers representing parties with interests in Belgium will welcome this guide, and academics and researchers will appreciate its value in the study of comparative constitutional law.

The Cambridge Handbook of Sociolinguistics Nov 22 2022 The most comprehensive overview available, this Handbook is an essential guide to sociolinguistics today. Reflecting the breadth of research in the field, it surveys a range of topics and approaches in the study of language variation and use in society. As well as linguistic perspectives, the handbook includes insights from anthropology, social psychology, the study of discourse and power, conversation analysis, theories of style and styling, language contact and applied sociolinguistics. Language practices seem to have reached new levels since the communications revolution of the late twentieth century. At the same time face-to-face communication is still the main force of language identity, even if social and peer networks of the traditional face-to-face nature are facing stiff competition of the

Facebook-to-Facebook sort. The most authoritative guide to the state of the field, this handbook shows that sociolinguistics provides us with the best tools for understanding our unfolding evolution as social beings.

Languages of the West Indies Aug 27 2020 "Based upon more than forty years of linguistic and ethnographic research, Douglas Taylor's work presents the languages of the Caribbean in all their variegated richness. Focusing as it does on language contact and linguistic change in the Caribbean from pre-Conquest times to the present, it brings the perspectives of linguistics, anthropology, and history to bear on a crucial area of the New World experience. The author concentrates first on the Amerindian languages of the Caribbean (Nepuyo, Shebayo, Yao, Taino, Arawak and Island-Carib). He provides the fullest account ever given of the linguistic situation and the history of these languages. Second, he turns to the so-called creole languages of the region, languages commonly associated with the enslaved Africans whose descendants make up the majority of the Caribbean population. He shows the derivations of the various language systems and the borrowings each language makes from another. Today, as Taylor demonstrates, these languages vie with standard dialects of European tongues in much of the Caribbean. In Haiti alone, probably more than five million persons speak a creole as their first language. By choosing these two important and radically contrastive dimensions for description and analysis, Taylor provides the reader with a broad, yet remarkably particular, overview of the phenomena of language and language change. Creole languages are spoken by millions of contemporary speakers; but the language of the Island-Carib has disappeared from the insular Caribbean. Thus, the idiom that once provided all the inhabitants of the lesser islands with their principal medium of

communication has now been almost completely supplanted. The principal languages of much of the region today are the outgrowth of lengthy and complex encounters among speakers of many different tongues, speakers who were themselves descended from newcomers whose own native languages were not or are no longer spoken in the region. As Taylor points out in his introductory comments, language, as the primary means of perpetuating culture, profoundly reflects and informs the culture itself. Its presence is a living representation of the way of life of people; its disappearance or destruction usually signals the replacement of our cultural system by another. In sum, Taylor has provided original and crucial evidence that the origin and character of the Caribbean creole languages must be sought in cultural history of the Caribbean creole-speaking peoples. He adopts the view that the early stage of the language reflected a lexicon, largely of Portuguese origin, that had been shaped in West Africa and subsequently reshaped in other regions under the influence of other languages. To this "reflexication" hypothesis, as it is called, he joins a necessary grammatical hypothesis."-- Book Jacket.

Linguistic Ecology Jul 18 2022 In this book, the author examines the transformation of the Pacific language region under the impact of colonization, westernization and modernization. By focusing on the linguistic and socio-historical changes of the past 200 years, it aims to bring a new dimension to the study of Pacific linguistics, which up until now has been dominated by questions of historical reconstruction and language typology. In contrast to the traditional portrayal of linguistic change as a natural process, the author focuses on the cultural and historical forces which drive language change. Using the metaphor of language ecology to explain and describe the complex interplay between languages, speakers and social

practice, the author looks at how language ecologies have functioned in the past to sustain language diversity, and, at what happens when those ecologies are disrupted. Whilst most of the examples used in the book are taken from the Pacific and Australian region, the insights derived from this area are shown to have global applications. The text should be useful for linguists and all those interested in the large scale loss of human language.

Swahili People and Their Language Sep 08 2021 History is a testament to what happened to a people or a place. It shows how things were and their transformation while explaining why the changes happened. Not only does history allow human beings to trace their trajectory in dealing with specific issues they face in the affairs of making a living, it also highlights movements between people around the world while showing their role in creating systems still in place today. History reveals to us major contributors of the trading systems along the east coast of Africa, documenting the role of the Swahili people and their interactions with different people of the world. The Swahili People and Their Language discusses ways in which the Swahili people came to occupy a prominent position in the world's trading system and how they lost their wealth through their contact with the outside world. The book highlights the strategic position occupied by the Swahili people, their natural resources, their skills and their rich cultural mix and how the contact with the outside world played a major influence that is clearly noticeable to date. The book contributes to the on-going discussion about Africans and their participation in today's development and reminds readers that the creation of the current economic, social and political situation of the Swahili people mirrors the history and positioning of many other formerly independent societies that became colonized nation-states. The

authors provide discussions that shade light on critical questions such as: Who are the Swahili people and why are they important? Is there such a thing as a Swahili Civilization? If so, what is it and how does it relate to modern civilization? What place does the Swahili language occupy both in its history and usage on the continent and in the rest of the world?
