This collection of essays both defines and reassesses the concept of utility. In considering the

place of ethics in the recent history of art and design, the text offers a way into the issues which concern design decision-makers today. The text presents topics such as the investigation in to hitherto undiscovered designs for a utility vehicle, it gives a perspective on the philosophy behind the concept of utility as a design theory and offers a critique of the dangers of good design. The text approaches the subject as a continuing history that has attempted to improve the human condition, through a process of rational thought in the construction of the material world. Using the

history of Utility as a design theory, the text suggests ways in which the past can teach us something of the present, and reveals why, on the cusp of the new millennium, Utility is important. Volume I contains summary records of the International Law Commission sessions on such subjects as: arbitral procedures, diplomatic immunities, Law of the Sea, nationality, Law of Treaties and Rights and Duties of States. Volume II contains reports of Special Rapporteurs and documents relating to the subjects discussed in Volume I including the report of the General Assembly. Regional identities

and practices are often debated in American archaeology, but Middle Atlantic prehistorians have largely refrained from such discussions, focusing instead on creating chronologies and studying socio-political evolution from the perspective of sub-regions. What is Middle Atlantic prehistoric archaeology? What are the questions and methods that identify our practice in this region or connect research in our region to larger anthropological themes? Middle Atlantic Prehistory: Foundations and Practice provides a basic survey of Middle Atlantic

prehistoric archaeology and serves as an important reference for situating the development of Middle Atlantic prehistoric archaeology within the present context of culture area studies. This edited volume is a regional, historic overview of important themes, topics, and approaches in Middle Atlantic prehistory; covering major practical and theoretical debates and controversies in the region and in the discipline. Each chapter is holistic in its review of the historical development of a particular theme, in evaluating its contributions to current scholarship, and in proposing

future directions for productive scholarly work. Contributing authors represent the full range of professional practice in archaeology and include university professors, cultural resources professionals, government regulatory/review archaeologists and museums curators with many years of practical and theoretical immersion in his/her chapter topic, and is highly regarded in the discipline and in the region for their expertise. Middle Atlantic Prehistory provides a much-needed synthesis and historical overview for academic and cultural resource

archaeologists and independent scholars working in the Middle Atlantic region in particular. Peter Gunnarson Rambo, son of Gunnar Petersson, was born in about 1612 in Hisingen, Sweden. He came to America in 1640 and settled in Christiana, New Sweden (now Delaware). He married Brita Mattsdotter 7 April 1647. They had eight children. He died in 1698. His daughter, Gertrude Rambo, was born 19 October 1650. She married Anders Bengtsson. Descendants and relatives lived mainly in Pennsylvania, Delaware, Virginia, North Carolina and Ohio. The Daltons have escaped!

Words that all fans of Lucky Luke know well. But this is the story of the very first time that the idiot brothers break out of jail. Driven by Joe's unshakeable need to get revenge on Lucky Luke, the outlaws terrorise several towns before hatching a genius plan: get the Lonesome Cowboy his very own wanted poster. As the local populace begins turning on him, Luke must display infinite patience in order to catch his quarry. New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social

consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture. As a member of a distinguished South Carolina family, Matthew Calbraith Butler led a most interesting life. His cavalry service during the Civil War saw him rise from regimental captain to major general in command of a division. He began the war with Jeb Stuart and participated in all of his early campaigns. Butler was wounded in the battle at Brandy Station and lost his foot as a result, but

he returned to duty and the battles outside of Richmond in 1864, then hurried South to resist Sherman's advance into South Carolina. Unlike many other Confederate generals, Butler remained influential after the War. He served in the U.S. Senate for eighteen years, oversaw the end of Reconstruction in South Carolina, and was a major general during the Spanish-American War. South Asia is often viewed as a potential nuclear flashpoint and a probable source of nuclear terrorism. But, how valid are such perceptions? This book seeks to address this question and assesses the

region's nuclear security from two principal standpoints. First, it evaluates the robustness of the Indo-Pakistani mutual deterrence by analysing the strength and weaknesses of the competing arguments regarding the issue. It also analyses the causes and consequences of nuclear arms race between India and Pakistan, the nature of deterrence structure in the region and the challenges of confidence building and arms control between the two countries in order to assess the robustness of South Asia's nuclear deterrence. Second, it assesses the safety and security

of the nuclear assets and nuclear infrastructure of India and Pakistan. The author holds that the debate on South Asia's nuclear security is largely misplaced because the optimists tend to overemphasise the stabilising effects of nuclear weapons and the pessimists are too alarmists. It is argued that while the risks of nuclear weapons are significant, it is unlikely that India and Pakistan will give up their nuclear arsenals in the foreseeable future. Therefore, what needs to happen is that while nuclear elimination should be the long-term goal, in the interim years the two countries need to

pursue minimum deterrence policies to reduce the likelihood of deterrence failure and the possibility of obtaining fissile materials by non-state actors. Book Review This volume addresses teachers and principals, presenting a comprehensive treatment of the methods of teaching in high schools. The author assumes a familiarity on the part of his readers with the nature of the learning process, adolescence, and the psychological foundations of interests and motives as they relate to whole-hearted pupil activity. The fundamentals of both theory and

practice are set forth, and an attempt has been made to outline and describe the newer types of procedure, which are being employed in different subjects in the best secondary schools.

Throughout the volume the attempt has been made clearly to represent practices rather than to advocate their adoption. The reader is permitted to draw his own conclusions. The book will appeal to the type of reader who wants to be intelligent about what is going on in high-school teaching. This is the first book that performs international and intertemporal comparisons of uniform tax

progression with empirical data. While conventional measures of tax progression suffer from serious disadvantages for empirical analyses, this book extends uniform measures to progression comparisons of countries with different income distributions. Tax progression is analyzed in terms of Lorenz curve and Suits curve equivalents of net incomes and taxes. The authors derive six distinct definitions of the relation "is more progressive than", which are then utilized for an empirical analysis of 13 countries included in the Luxembourg Income Study (LIS). In two thirds of all

international comparisons of tax progression, the authors report a clear ranking of the respective countries in terms of progression dominance. Tax based definitions of greater progressivity perform best. These observations are yet reinforced by statistical tests. The book also provides an account of the institutional background of the involved countries in order to facilitate the interpretation of the data. Moreover, the authors conduct intertemporal comparisons of tax progression for selected countries and perform a sensitivity analysis with respect to the parameterization of

the equivalence scale. For this book, which follows an earlier volume of previously published essays, Hewitt and Bergeron have enlisted ten gifted historians---among them James M. Prichard, Terrence J. Winschel, Craig Symonds, and Stephen Davis---to produce original essays, based on the latest scholarship, that examine the careers and missteps of several of the Western Theater's key Rebel commanders. Among the important topics covered are George B. Crittenden's declining fortunes in the Confederate ranks, Earl Van Dom's limited prewar military

experience and its effect on his performance in the Baton Rouge Campaign of 1862, Joseph Johnston's role in the fall of Vicksburg, and how James Longstreet and Braxton Bragg's failure to secure Chattanooga paved the way for the Federals' push into Georgia. -- Material Culture from Prehistoric Virginia: Volume 1 is one volume of a two-volume set. This two-volume set is available in black and white and in color. Volume 1 contains artifact listings from A through L. Volume 2 contains the remainder of the alphabetical listings. These publications contain over 10,000 prehistoric artifacts

mainly from Virginia, but the publication covers the eastern U. S. The set starts with Pre-Clovis and goes through Woodland times with some Indian ethnography and rockart. Each volume is indexed, contains references, has charts and graphs, drawings, photographs, artifact dates, and artifact descriptions. These volumes contain artifacts that have never appeared in the archaeological literature. From beginners to experienced archaeologists, they offer a complete library for the American Indian culture and experience. If the prehistoric Indian made it, an example

is probably shown. Ellis relates the story of the Memphis Daily Appeal, the mobile newspaper that rallied Southern civilians and soldiers during the Civil War, and eluded capture by Yankee generals who chased the Appeal's portable printing operation across four states. The study also serves as a biography of the news First Published in 2009. Routledge is an imprint of Taylor & Francis, an information company. Vols. 2, 4-11, 62-68 include the Society's Membership list; v. 55-80 include the Journal of applied mechanics (also issued separately) as contributions from the Society's

Applied Mechanics Division. Includes cases argued and determined in the District Courts of the United States and, Mar./May 1880-Oct./Nov. 1912, the Circuit Courts of the United States; Sept./Dec. 1891-Sept./Nov. 1924, the Circuit Courts of Appeals of the United States; Aug./Oct. 1911-Jan./Feb. 1914, the Commerce Court of the United States; Sept./Oct. 1919-Sept./Nov. 1924, the Court of Appeals of the District of Columbia. This book provides a single-source for projectile points in the literature of American archeology. Its purpose is to provide a quick

lookup for point types; the user then utilizes the basic references that are provided for more research information, point comparisons, data, distributions, etc. 001 - Our Concern as Teachers Educators: The Hegemonic Forces of Dominant Ideology Patrick M.
