As one of the original 'Little Dragon' or 'Tiger' economies, South Korea has grown and prospered since the early years of the 1960s, and is now home to several major world-class multinational companies, such as Hyundai and LG, Samsung. In turn, it has developed a distinctive style of management, which derives from a shared Asian heritage but is nonetheless unique to South Korea. The collection covers a variety of themes, topics and issues from a range of perspectives and fields in management and business studies. This book was originally published as a special issue of Asia Pacific Business Review. Innovations are dramatically changing the traditionally conservative global ocean shipping industry as it works to become more efficient and more sustainable. Academic and former shipping company owner Peter Lorange is best placed to make sense of how to approach and keep ahead of these changes. This book explains what the key innovations are, how to ensure a return on investment, the barriers to innovation and how to overcome them. Drawing on a number of specialist case studies, Lorange outlines the specific analytical and decision-making steps to consider and actions to take to arrive at a new strategic blueprint for modern shipping companies. This book is invaluable for practising shipping company executives, advanced students of shipping, logistics, port management and maritime economics and investors deciding whether to invest in a particular shipping firm. This book deals with both the understanding of, and the explanation of, knowledge about the causes, processes, and patterns of convergence innovation. It argues that the process of convergence innovation is a continuous disequilibrium between reference technology and its matching technology, adjusting the optimal balance between the functions of the two technologies. Contributors describe how convergence innovation is a learning process that requires both vertical and horizontal convergence, and case studies explore the different types of convergence innovation such as outside-in and inside-out. Convergence innovation has been taking place mainly by applying IT technologies to vast areas of conventional technologies, so that individuals or firms reap the benefits of the convergence between IT and conventional technologies. Such innovations are made possible by convergence, and they ultimately improve the welfare of human beings as companies solve diverse problems and increase employment. Examples in this book include biochemical companies in Indonesia, who were able to increase their market shares in bio-fertilizer and bio-pesticide products through bio-based technological convergence; and textile machinery firms in South Korea who have been survived by achieving convergence innovation on their core competences. This book was originally published as a special issue of the Asian Journal of Technology Innovation. South Korea (Republic of Korea) is the more successful of the two Koreas in both economic and political terms. Even the Asian economic crisis of 1997–1998, which hit badly, was weathered successfully, and when the next crisis came along in 2007, South Korea coped better than many other countries. This economic strength, taken with the steady progress of democratization since 1987, indicates that when the peninsula is eventually reunified, as one day it probably will be, a new unified Korea will follow the South Korea model rather than that of North Korea. This fourth edition of Historical Dictionary of the Republic of Korea contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities as well as aspects of the country's politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about the Republic of Korea. `There's no business like the car business!` Within months of its launch in late 1998, with every well-known global automobile brand jockeying for a foothold in a small-car market almost monopolized by Maruti Udyog Limited, Hyundai Motor India's debut production, the Santro, emerged as a force to reckon with. The first car to be conceptualized and designed for ? and then developed and manufactured in ? India, the `Sunshine Car` has, over a period of sixteen years, set the record for the quickest small car brand to go from zero to one million units sold. It achieved profitability for Hyundai at an unprecedented speed and made an impressive global impact as a made-in-India automobile in markets as diverse as Algeria and Zimbabwe, Western Europe and North America. In Santro: The Car That Built a Company, BVR Subbu, who spearheaded much of the Santro's success, reveals the hitherto untold story of how this small car made such a big impact. Vivid anecdotes detail the challenges of introducing a new product in a new market, the canny business strategies that were employed to get the better of rival brands, the unforgettable marketing campaigns that made all the difference ? and the thrills of the high-stakes power battles and everyday drama that characterize corporate India. By turns revelatory, insightful and delightfully engaging, this is a business story with a difference about a car like no other. This is a student-focused text which takes an international approach to the subject. Korea's economic success has inspired numerous studies and research projects in past decades. Despite good efforts to analyze the strategy of Korea, earlier studies have not been able to comprehensively and systematically explain the country's "miraculous" growth. After thorough analysis of these earlier studies, a new model has been developed by showing that a country or firm does not have to be more innovative or possess more resources to have a competitive advantage over others. In *The Strategy for Korea's Economic Success*, Hwuy-Chang Moon details four factors that comprise the ABCD model and illustrates how the Korean government, corporations, and people have exemplified these factors in achieving their current level of success. The four factors are agility (speed + precision), benchmarking (learning + best practices), convergence (mixing + synergy), and dedication (diligence + goal-orientation). Together, these factors have enabled Korea's economic success and will continue to drive the next level of growth. Anyone can become more competitive with proper implementation of the ABCDs. Korea's development strategy holds special value, because it is more practical and appropriate for many developing countries. For more developed countries, on the other hand, the ABCDs can be used to fast-track the next phase of growth. Moon also highlights the role of internationalization in broadening the scope of strategic choices, and shows how the combined implementation of internationalization and the ABCDs deepens the pool of strategic resources.

Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information. Covers all U.S. and Canadian models of Hyundai Santa Fe. The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week. Peace through tourism refers to a body of analysis which suggests tourism may contribute to cross-cultural understanding, tolerance and even peace between communities and nations. What has been largely missing to date is a sustained critique of the potential and capacities of tourism to foster global peace. This timely volume fills this void, by providing a critical look at tourism in order to ascertain its potential as a social force to promote human rights, justice and peace. It presents an alternative characterisation of the possibilities for peace through tourism: embedding an understanding of the phenomenon in a deep grounding in multi-disciplinary perspectives and envisioning tourism in the context of human rights, social justice and ecological integrity. Such an approach engages the ambivalence and dichotomy of views held on peace tourism by relying on a pedagogy of peace. It integrates a range of perspectives from scholars from many disciplinary backgrounds, non-governmental organisations (NGOs), tourism industry operators and community, all united by an interest in critical approaches to understanding peace through tourism. Additionally diverse geo-political contexts are represented in this book from the USA, India, Japan, Israel, Palestine, Kenya, the Koreas, Indonesia, East Timor and Indigenous Australia. Written by leading academics, this groundbreaking book will provide students, researchers and academics a sustained critique of the potential and capacities of tourism to foster global peace. This book criticizes the widespread view that the 1997 Asian crisis was due to 'crony capitalism' and puts the blame instead on misguided liberalization. It analyzes the case of Korea's business conglomerates, the chaebol, with particular attention to the car industry, to show how liberalization contributed to the crisis even at the level of the firm. It shows how those firms that had developed innovative capabilities survived the crisis much better than those that had merely expanded into markets opened up by liberalization. Over the past ten years, the corporate governance environment in East Asia has undergone a significant transformation. The Asian Financial crisis, together with Japan's long economic malaise, undermined confidence in the corporate structures, governance practices, and regulatory oversight of firms in the region. Since that time, each of the countries in the region has been a hotbed of legislative, judicial, and market activity in the realm of corporate governance. This book takes stock of the most important recent corporate governance changes in the region and the challenges still to be overcome. The contributors pursue this objective, not by describing laundry lists of legal reforms and problems, but by focused in-depth legal analysis on specific issues facing the separate systems in the wake of - sometimes in spite of - the voluminous reforms and market changes of the past decade. Written by the leading corporate law scholars and policy advisors in East Asia and some of the most renowned scholars of comparative corporate governance in the United States, the papers are methodologically united in their careful attention to the impact, and limitations, of legal reforms on corporate governance in East Asia today. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Fuel cell systems have now reached a degree of technological maturity and appear destined to form the cornerstone of future energy technologies. But the rapid advances in fuel cell system development have left current information available only in scattered journals and Internet sites. The even faster race toward fuel cell commercialization further Viewed from afar, North Korea may appear bizarre, or positively irrational. But as Nicholas Eberstadt demonstrates in this meticulously researched volume, there is a grim coherence to North Korea's political economy, and a ruthless logic undergirding it--one that unreservedly subordinates economic welfare to

augmentation of political power. Thus, paradoxically, even as official policies and practices consign the DPRK economy to a perilous realm between crisis and catastrophe, the country's leadership maintains unchallenged domestic control and has actually managed to increase its international influence. Through painstaking collection of hard-to-uncover data and careful analysis, Eberstadt provides a quantitative tableau of North Korea's terrible failure in its economic race against South Korea; its stubborn adherence to policies all but guaranteed to stifle growth and undermine economic performance; and the longstanding official effort to ignore, or mitigate, pressures for economic reform. Eberstadt is skeptical of optimistic accounts from South Korea and elsewhere suggesting that the North Korean leadership is interested in resolving the current nuclear impasse, and getting on with the business of reform and development. So long as Pyongyang's rulers entertain the ambition of reunifying the Korean peninsula on its own terms, Eberstadt argues, economic reforms worthy of the name will be subversive of state authority--and vigilantly resisted by Pyongyang's rulers. This authoritative volume has received widespread attention from Asian specialists, well as those concerned with nuclear proliferation and world peace, and international relations professionals in general.
