This is the new edition of the best-selling six-level Reading Explorer series will bring the world to the classroom like never before through new and updated topics, video, and visuals from National Geographic. Reading Explorer teaches learners to think and read critically to encourage a generation of informed global citizens. Pathways, Second Edition, is a global, five-level academic English program. Carefully-guided lessons develop the language skills, critical thinking, and learning strategies required for academic success. Using authentic and relevant content from National Geographic, including video, charts, and other infographics, Pathways prepares students to work effectively and confidently in an academic environment. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. This book is special. It proposes a style of drama that liberates teachers and children from traditional dialogues...The dramas, each linked to a literacy text or wider theme, are amazing...I would recommend buying this. It challenges, but rewards with a new level of classroom dialogue' - Literacy Time 'This new book for teachers is timely and full of good ideas. It demonstrates the value of drama as a means of achieving education that stimulates creative and critical thinking while also engaging the emotions' - Teaching Thinking & Creativity Showing teachers how to use drama to promote speaking and listening for pupils, including those who find learning difficult, this book describes, analyses and teaches how to use role play effectively and looks at how to generate a productive dialogue between teachers and pupils that is both powerful and enabling. The authors present innovative methods for teaching across the curriculum which are genuinely inclusive and can help to motivate reluctant learners. The 'how to' section of the book describes a range of strategies and approaches: o how to begin with 'teacher in role' o how to begin planning drama o how to generate quality speaking and listening o how to use drama for inclusion and citizenship o how to generate empathy in drama o how to link history and drama o how to begin using assessment of speaking and listening (and other English skills) through drama The second section includes full lesson plans that have been tried and tested with pupils, complete with detailed guidance on how to structure the work and how to play the teacher roles. Each is linked to literacy, the wider curriculum, PSHE and citizenship. The book is a valuable resource for primary teachers in training and in practice. A high level of literacy in both print and digital media is required for negotiating most aspects of 21st-century life, including supporting a family, education, health, civic participation, and competitiveness in the global economy. Yet, more than 90 million U.S. adults lack adequate literacy. Furthermore, only 38 percent of U.S. 12th graders are at or above proficient in reading. Improving Adult Literacy Instruction synthesizes the research on literacy and learning to improve literacy instruction in the United States and to recommend a more systemic approach to research, practice, and policy. The book focuses on individuals ages 16 and older who are not in K-12 education. It identifies factors that affect literacy development in adolescence and adulthood in general, and examines their implications for strengthening literacy instruction for this population. It also discusses technologies for learning that can assist with multiple aspects of teaching, assessment, and accommodations for learning. There is inadequate knowledge about effective instructional practices and a need for better assessment and ongoing monitoring of adult students' proficiencies, weaknesses, instructional environments, and progress, which might guide instructional planning. Improving Adult Literacy Instruction recommends a program of research and innovation to validate, identify the boundaries of, and extend current knowledge to improve instruction for adults and adolescents outside school. The book is a valuable resource for curriculum developers, federal agencies such as the Department of Education, administrators, educators, and funding agencies. No other description available. Pathways is a dual skills course that can be taught in parallel or as individual strands - Reading and Writing, and Listening and Speaking - and topics and language complement and mirror each other. Students benefit from a targeted skills syllabus where they can really develop, not just practice, the skills they will need for effective use of language. Pathways particularly lends itself to academic learners of English, with the topics and language input texts taken from a more academic context. In addition, the strong critical thinking element present in both strands encourages and stimulates the 'higher order' thinking skills and the students' ability to evaluate, analyse, and synthesise information from a wide range of sources. Meaningful and authentic content from National Geographic stimulates creates the perfect environment for this and stimulates learners' curiosity and participation. An introductory textbook that assumes no prior knowledge of linguistics or second language acquisition, this book presents a comprehensive overview of the theoretical foundations, methods and practices of Teaching English as a Foreign Language (TEFL) for pre-service teachers. Lennon covers the theoretical bases for TEFL and addresses second language-acquisition research, past and present EFL teaching methodology, as well as psychological and social approaches to individual language-learner variation. Further chapters provide extensive yet accessible coverage on essential foundational topics, including chapters on pronunciation, grammar, vocabulary, literature and testing. Offering a sociocultural approach in which the teacher is seen as a facilitator and supporter of students' self-directed learning, this text provides the prospective teacher with the knowledge and skills to be an effective educator in the EFL classroom. The targeted EFL focus makes this book ideal for pre-service teachers and for teacher training programmes around the world. Each chapter includes a Food for Thought section with questions for reflection and a Further Reading list. The Audio CDs contain audio recordings for all of the listening exercises in the Pathways Listening, Speaking, and Critical Thinking Student Books. The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site. Jesus said, "My sheep hear My voice," but many Christians do not know how to hear from God. In this practical, story-rich guidebook, international teacher Larry Kreider shows believers how to develop a listening relationship with the Lord. Speak Lord, I'm Listening explores the multiple ways Christians can hear the voice of God in today's world. It offers real-life examples of how God teaches His followers to listen. Contains tips in each chapter for distinguishing His voice from the noise of Satan's interference. Christians across the denominational spectrum will develop a closer and deeper relationship with God as they learn fifty unique ways to listen to Him. You will realize that God was speaking to you all along but, like the disciples on the road to Emmaus, you didn't know it was Him! Now in a new edition, World Link helps adult learners communicate fluently and confidently in English. It develops language skills through use of dynamic vocabulary, essential grammar, engaging topics and fascinating images. Learners will experience the topics and language come alive through an expanded video program! Pathways, Second Edition, is a global, five-level academic English program. Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children. What does it mean to conduct research for justice with youth and communities who are marginalized by systems of inequality based on race, ethnicity, sexuality, citizenship status, gender, and other categories of difference? In this collection, editors Django Paris and Maisha Winn have selected essays written by top scholars in education on humanizing approaches to qualitative and ethnographic inquiry with youth and their communities. Vignettes, portraits, narratives, personal and collaborative explorations, photographs, and additional data excerpts bring the findings to life for a better understanding of how to use research for positive social change.
